

About Knowmia

Knowmia (www.knowmia.com) is an online platform that helps teachers easily integrate technology into their teaching, in and out of the classroom. Our end-to-end solution enables teachers to create video presentations and multimedia assignments, distribute them to students and track their mastery over time. Knowmia's tools help fulfill educators' growing interest in the integration of video so they can:

- Support students with individualized instruction
- Increase student engagement
- Gain extra time for in-class collaborative learning

Designed with input from teachers, these free tools provide the flexibility teachers need to use them with other platforms.

Tools for Teachers

Create & share video presentations

Download our free or paid iPad app, Knowmia Teach or Knowmia Teach Pro, or use any tool to create video presentations, upload to them Knowmia.com and share with your students.

Discover the lessons you need

Our growing library has over 30,000 lessons of educational video content from teachers everywhere. Lessons are tagged and organized for easy discovery

Track your students' progress

Create interactive home assignments using video lessons, summary slides and questions and get real-time metrics on your students' performance

Showcase your teaching knowledge

Build online courses to help students everywhere grasp concepts or subject areas through lessons, instructions and assessments

Learn how to use video in your teaching

Knowmia offers free resources to help you create video presentations and learn from experienced teachers who have mastered the use of video lessons
